

RecordKeeper is an easy to use, web-based program for recording the day to day activities of your operation. Its simple but powerful interface allows you to keep track of every aspect vital to your farm operations such as equipment use, fertilizer/pesticide applications, personnel costs, and more. You can also record management practices such as variety or tillage, insurance expenditures, rent, and other miscellaneous expenses. RecordKeeper's custom reports will then aid you in compliance, show you detailed costs and return on investment, and enable you to see every aspect of your operation at a glance.

RecordKeeper is just one of many modules currently available in the AgFleet suite of products.

Consult your sales representative for more information on the AgFleet Program.

RecordKeeper

No software to install. No Equipment to buy.
Managing your fields has never been easier.

AgFleet

Unlike competitors' systems, AgFleet's RecordKeeper is web-based. This means there is no need for the user to install any desktop software. Any computer with a modern web browser such as Internet Explorer, Mozilla, or Netscape Navigator and an internet connection will be able to use the system, and upgrades appear automatically, as soon as they are available. Off-site storage ensures the integrity and safety of your data.

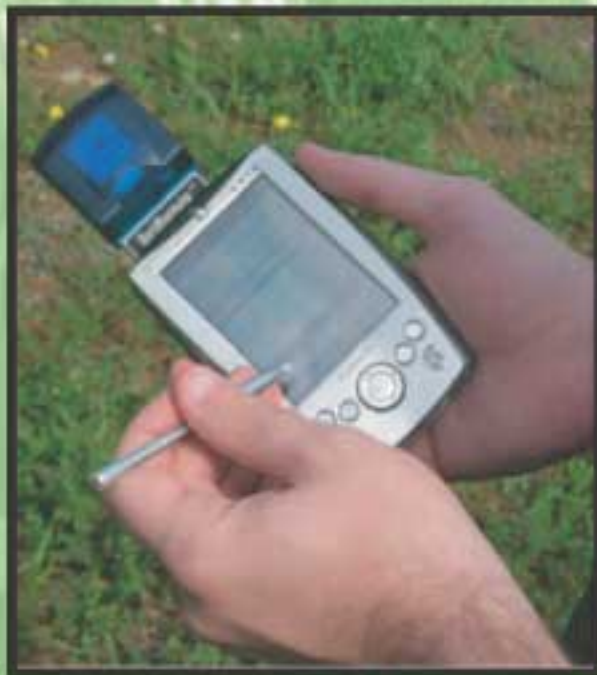

- Track any crop, any expense
- Organize data at the sub-field level

- Export data to third-party formats, such as HighQ®

- Net return analysis at the press of a button

- Map-based tools and reports with ortho-digital backgrounds

- Friendly, knowledgeable support staff

While no software is required to use the RecordKeeper system, we do offer custom PDA software that enables users to make records in the field, which can then be uploaded when they return to the office.

- Intuitive, calendar-based user interface
